

Contraception:

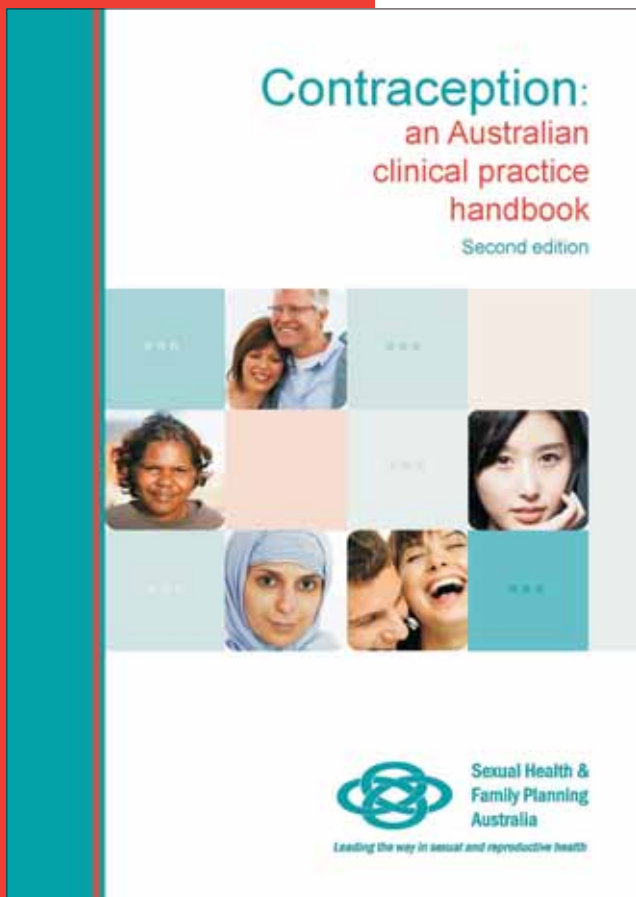

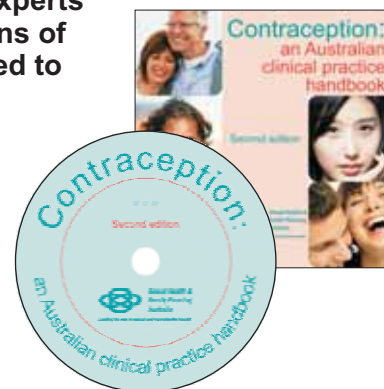

an Australian
clinical practice
handbook

**Second edition
available now**

– produced and published by
Sexual Health & Family Planning Australia (SH&FPA)

The second edition of the handbook, co-authored by medical experts from member organisations of SH&FPA, has been updated to include the latest international research and expert opinion on all methods of contraception.

It aims to support and promote optimal clinical practice by providing GPs and nurses with evidence-based consensus recommendations on contraceptive delivery in the Australian setting.

Available as an A4 book

\$55* or

Book and CD package

\$88*

*(plus postage)

**Fax or mail order
form to:**

Key features:

- Information on contraceptive methods, including advantages and contraindications
- Prescribing in special circumstances (eg young women and women post partum)
- New practice recommendations
- Essential drug interaction information
- Contraceptive guidelines for patients with complex medical conditions (eg thromboembolism, diabetes and HIV)
- Alternative contraceptive technologies
