

Queensland GPs:

Papilloma Virus or Paps – which test will it be?

- Are Pap smears soon to become a thing of the past?
- HPV vaccination and testing – will it change cervical screening guidelines?
- What's the difference between a 24yo with LSIL and a 42yo with LSIL?
- HPV DNA testing – what is its place?
- Do women under 20 benefit from cervical screening?
- How important are endocervical cells?

Family Planning Queensland (FPQ) is an RACGP accredited education provider

As part of the Queensland Health Cervical Screening GP Upskilling Project, FPQ can tailor a free 30 minute to two hour practice based workshop to suit your needs.

You choose the location
You choose the time
You choose the format

Workshop content can include any aspect of cervical screening eg:

- Overview of current guidelines
- HPV and the cervix
- Risk management in cervical screening
- Pap smear taking tips and tricks
